I'm a front-end software engineer with expertise in building modern, responsive web applications using JavaScript. My focus is on React and TypeScript, creating intuitive user interfaces and engaging digital experiences. I have worked on company projects involving online casino games and CMS platforms.

WORK EXPERIENCE

Front-end developer

GlobalX Digital Corporation

June 2025 - Present

- Built the iGaming Platform, a PAGCOR-compliant iGaming platform serving production users,
- Use Playwright for automation testing and to simulate the application across multiple browsers
- Websocket for real-time updates for wallet update, countdown timer, and game events.
- Built the back office for the admin dashboard

Full-stack developer - Contract

Euro Exim Business Management

Feb 2025 - June 2025

- Managing fast-paced front-end development, integrating APIs, and handling back-end tasks for admin systems while ensuring everything runs smoothly and maintains a clean, user-friendly interface

Front-end developer

FunJ software development

January 2024 - January 2025

- Built and maintained the PC/H5 different themes
- Built the landing page that users can direct to the PC/H5 version
- Developed responsive admin interfaces using React.js, TypeScript, and Ant Design to ensure consistent user experience across platforms

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

→ 2018 - 2022 STI LASPINAS

SKILLS & TOOLS

- JavaScript, HTML, CSS, TailwindCSS, Typescript, MongoDB, ReactJS, NextJS, React-Native
- Docker, AWS, VsCode, Linux, Postman, Github, Jira, Bitbucket.
- Collaborative and detail-oriented.
- Mobile and web development

Front-end developer

Philtech Info Services Inc.(Filbet.com)

June 2023 – January 2024

- Led the migration of a legacy Nuxt.js project to Next.js, improving maintainability and performance
- Implemented Redux for scalable state management and Tailwind CSS for modern, responsive styling
- Integrated React Hook Form to streamline form handling and validation processes
- Enhanced SEO and performance through optimization techniques in the Next.js architecture.
- Collaborated with cross-functional teams to ensure smooth delivery and consistent project progress.
- Managed development workflow and task tracking using JIRA

Front-end developer

Vavasoftware Corp.

December 2022 – June 2023

- Maintained and optimized responsive web applications using Vue.js and Bootstrap
- Developed a landing page for the web application using WordPress.
- Collaborated with the team using Bitbucket for version control and code management.
- Managed deployments to UAT and FAT environments through Jenkins CI/CD pipeline.
- Worked within an Agile framework, actively participating in Scrum ceremonies for sprint planning and progress tracking

Front-end developer

Dynamic Strategy

January 2022 – December 2022

- Developed and maintained front-end features for company projects,
- focusing on performance and user experience, collaborated with backend teams to integrate APIs and improve data interactions, and supported QA efforts by identifying and resolving issues efficiently
- Built responsive user interfaces for the admin (CMS) platform using React.js and Ant Design
- Followed Agile methodologies to optimize development workflows. Managed deployments to UAT and FAT environments
